

# Using the Data Access Service

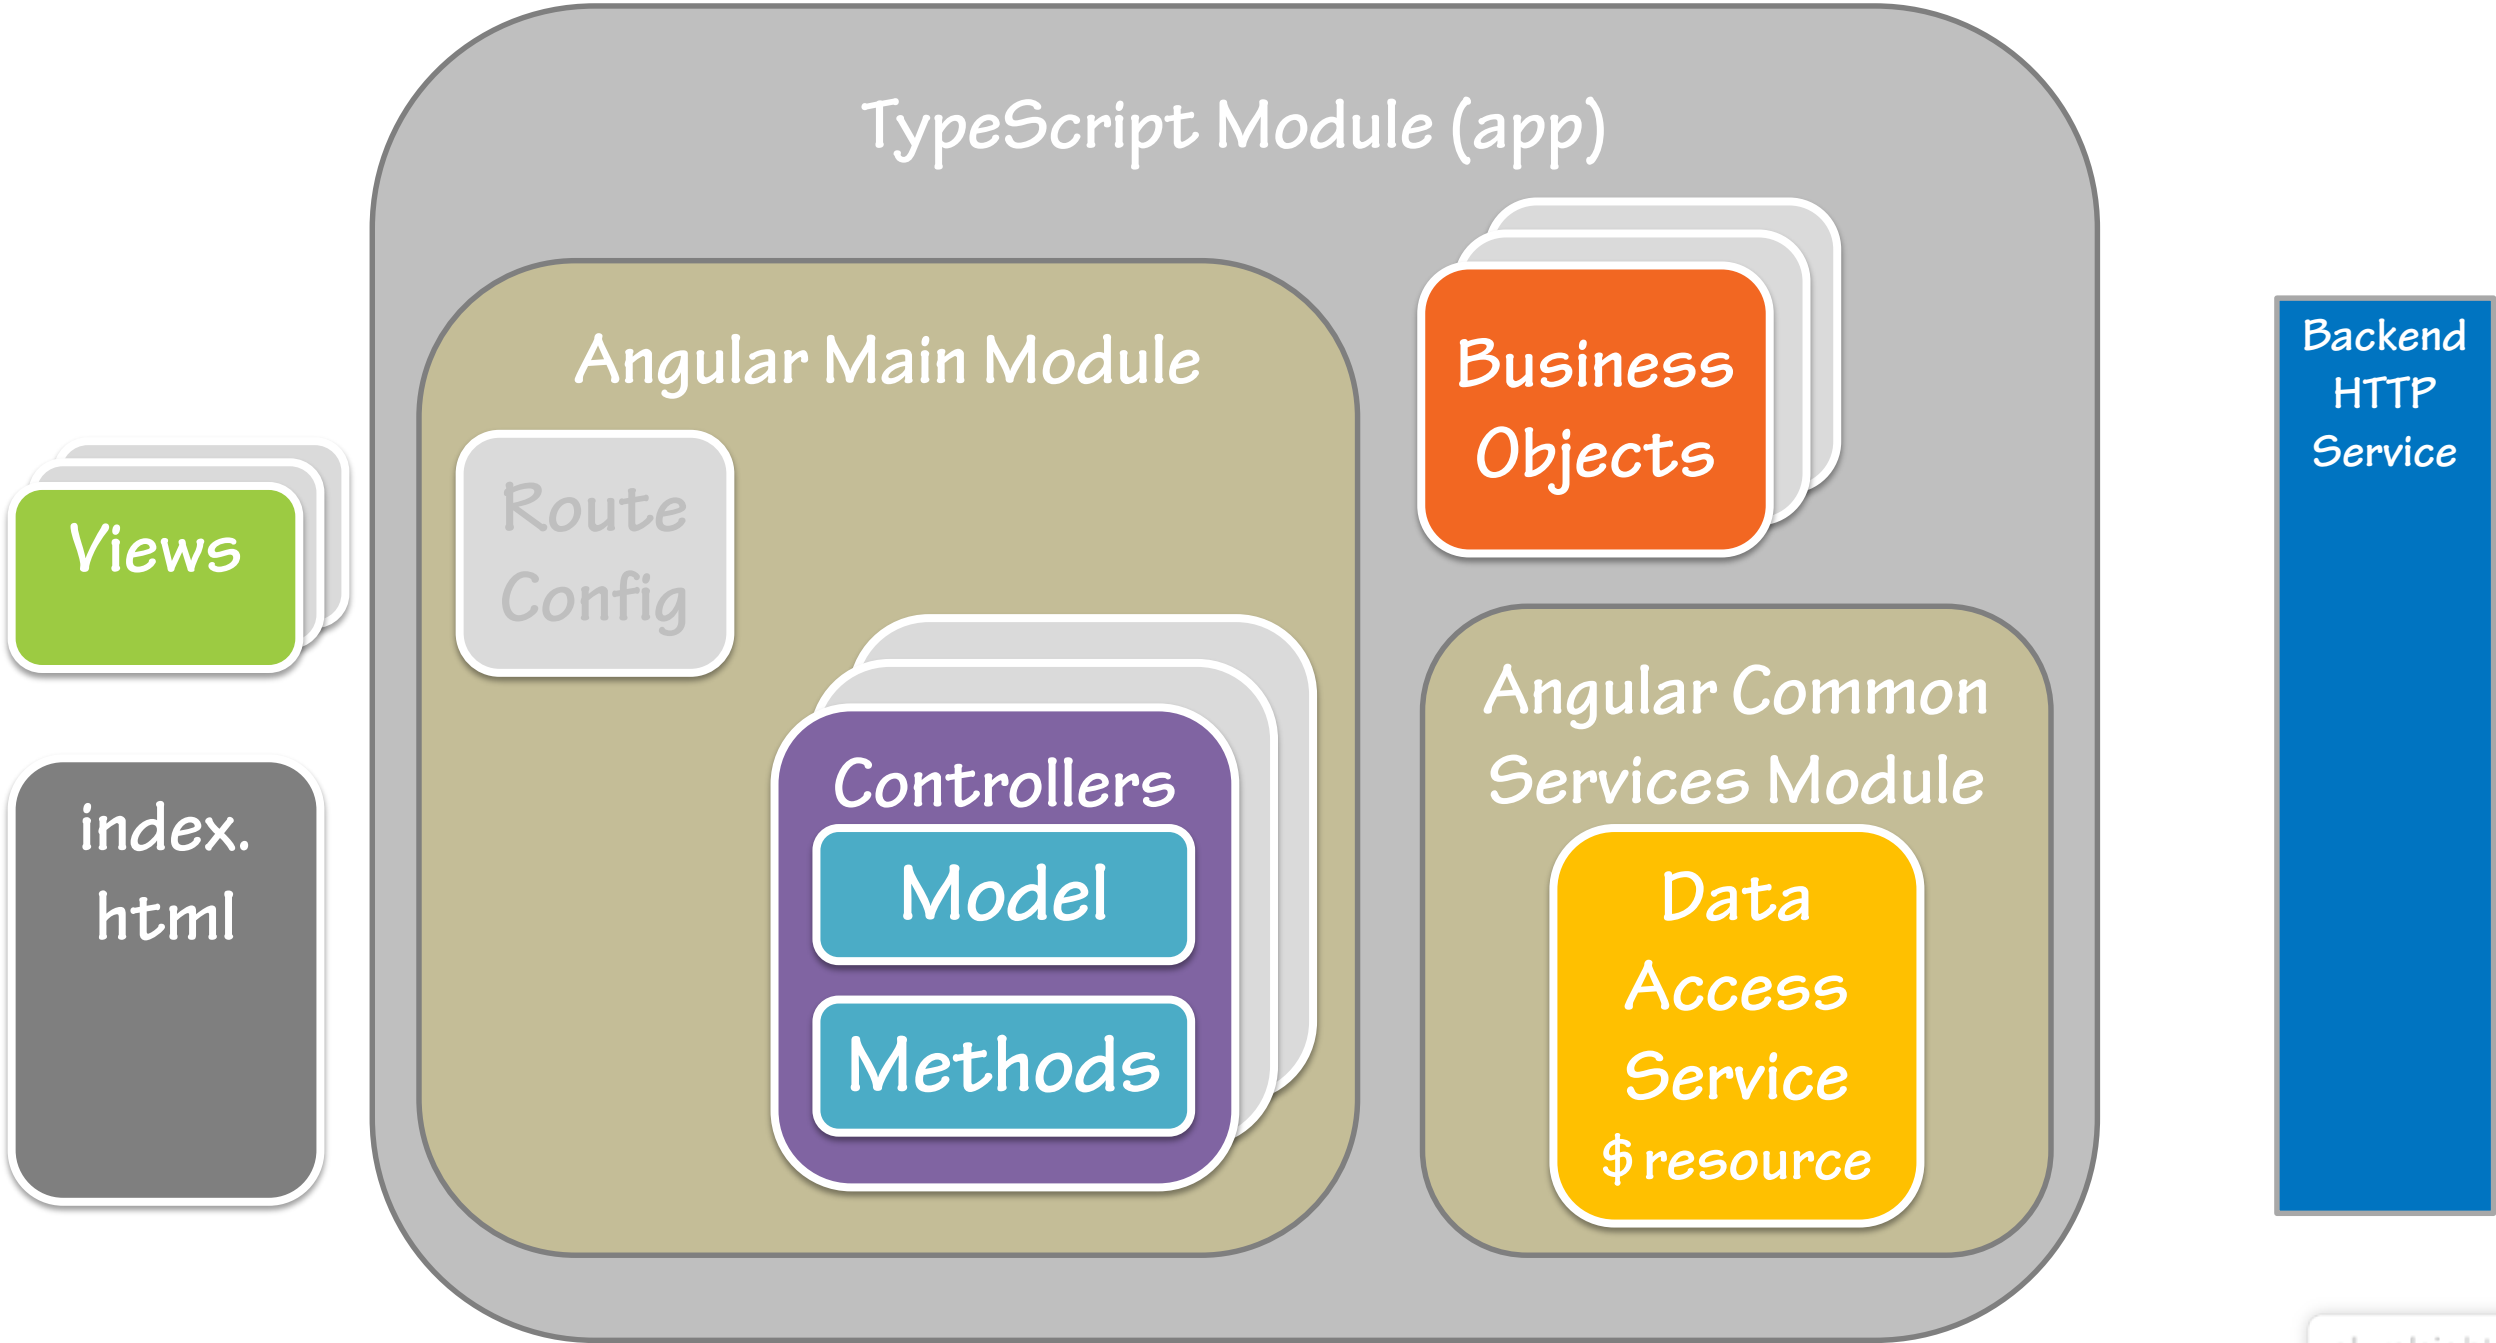

Deborah Kurata

@deborahkurata | [blogs.msmvps.com/deborahk/](https://blogs.msmvps.com/deborahk/)

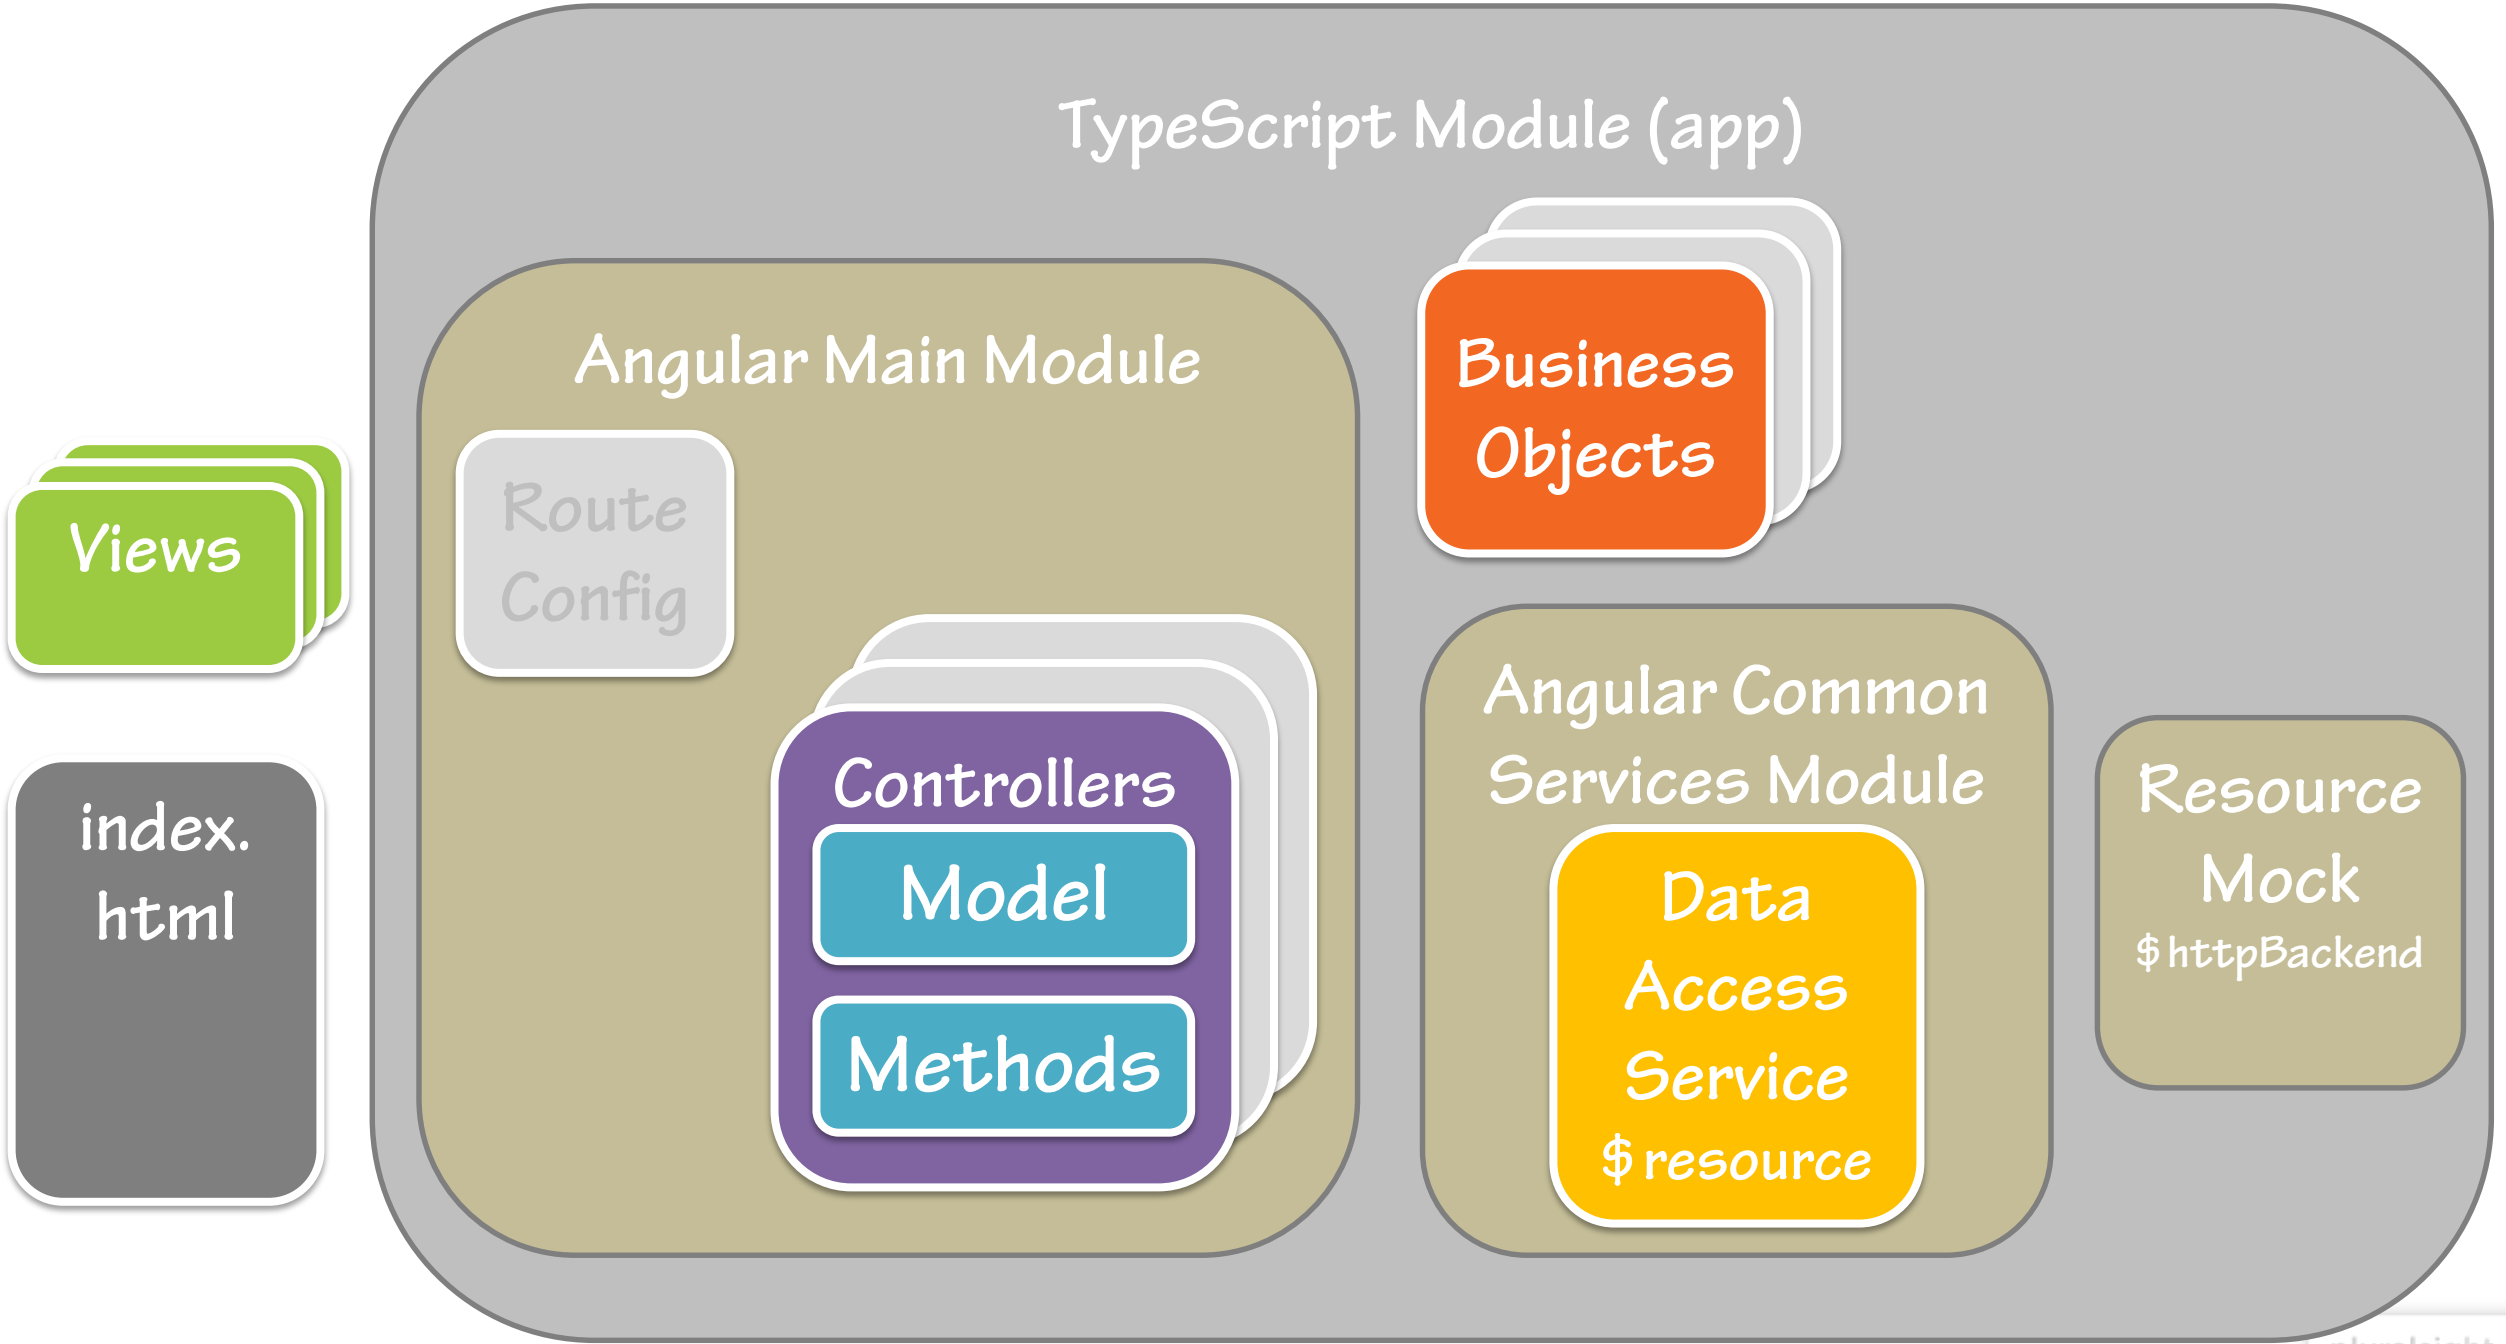

# Module Overview

Mock the HTTP  
Responses

Use that Service in  
an Angular  
Controller

# Mocking HTTP Responses

- `$httpBackend`
  - Angular's HTTP backend mocking implementation
  - Mocks calls to the backend HTTP Web service
  - Returns static data we can define
  - Located in `angular-mocks.js`
- Two implementations:
  - `ngMock`: for unit testing
  - `ngMockE2E`: for end-to-end testing and backend-less development

# Using a Service

Identify the Dependency

Inject the Service

Use the Service

# This Module Covered

Mocking the HTTP Responses

Using that service in an Angular controller

Identifying the dependency

Injecting the service

Using the service
